

FEATURES

- The LB Series LED downlight is comprised of a LED module and housing kit.
- The LED modules provide high lumen performance and is easy to install.
- With interchangeable housings, the downlight can be adapted to most application and design.
- The downlight comes in different beam angles and offers CRI>90 and glare-control reflector design allowing directional light and highlighting surroundings effortlessly.
- The LB Series is ICF-rated and offers style, discretion, and flexibility with a wide selection of interchangeable housings.
- The downlights are particularly suitable for shopping mall, hotel, exhibition hall and museum.
